

- ✓ **Block offensive sites**
- ✓ **Allow authorized sites**
- ✓ **Restrict disruptive software (chats, games)**
- ✓ **Block unapproved downloads (video, exe)**
- ✓ **Compatible with all major browsers**

BrowseControl is an easy to use Internet Management program that helps prevent inappropriate surfing and enforces Internet usage policies across your enterprise.

✓ **Enable/Disable Internet Access** Totally block or allow Internet access to individual or group PCs/Users, conveniently from a central console.

✓ **Allow Access to Approved URLs** Enable browsing to selected sites only, lock out the rest.

✓ **Block Inappropriate URLs** Restrict access to non-work related sites.

✓ **Scheduler - New Enhancements** Schedule unrestricted browsing at specific times (e.g. lunch time). Or allow/block access to specific URLs at allotted times.

✓ **Multiple Consoles** Install separate consoles in each department/classroom to allow the managers/teachers to manage their own individual employees/students.

✓ **Application Blocking** Prevent users from activating unauthorized software: games, chats and media players.

✓ **Block Personal Emails** Block user access to personal email via gmail, yahoo mail, hotmail etc. to ensure that no security threats are bypassed, and increase employee productivity.

✓ **Offsite Internet Control** BrowseControl policies such as allow/block lists and application blocker settings can be configured to offsite laptops.

✓ **Port Filtering/Block Downloads** Restrict the downloading of unsolicited files such as video, audio, exe formats to protect your network from malicious files.

✓ **User or Computer based policies** Internet restriction policies can be configured by user or by workstation.

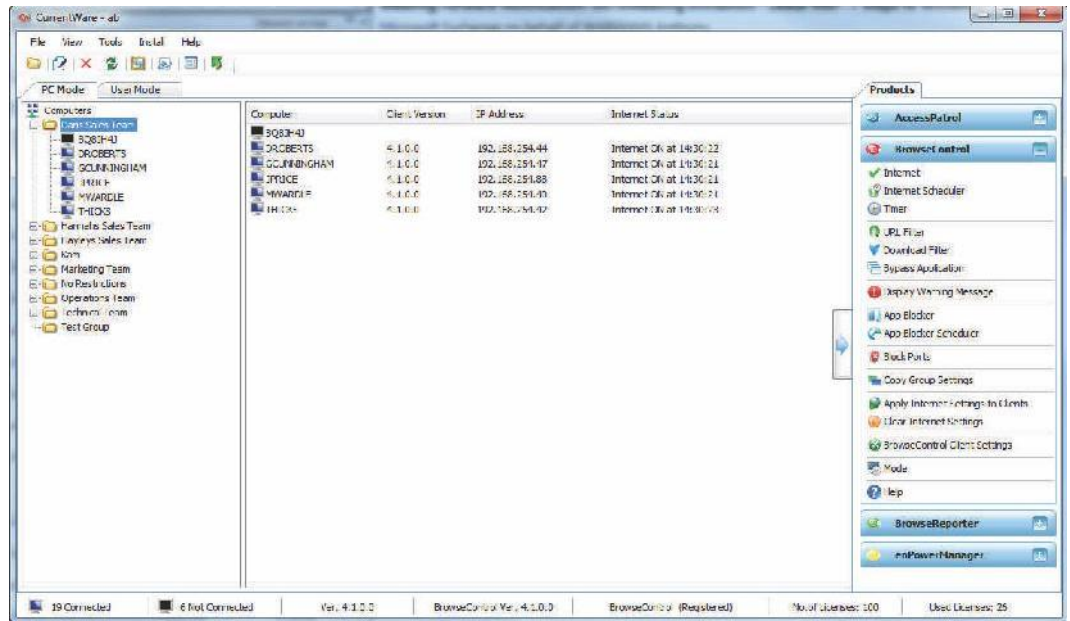

Supported Operating Systems:

BrowseControl Server/ Console:

Windows 2003/2008, XP, Vista and Windows 7

BrowseControl Client:

Windows 2003/2008, XP, Vista and Windows 7

"BrowseControl is a simple solution to a serious problem. We found it remarkably easy to install and configure and the levels of control it provides, are very extensive and can be customized to suit a wide range of network environments"

- Network Computing

What's New

Improved Console and Client Architecture

A new designed console, the **CurrentWare Console**, provides a more powerful and robust interface for administering the BrowseControl policies. The new client, the **CurrentWare Client**, can remotely be installed from the Console or through Active Directory.

Terminal Server Compatibility

BrowseControl can now support Windows Terminal Server environment. Effectively manage the Internet restriction policies of both thin and thick clients.
